

Periodic Cleaning

Specialist Cleaning & Periodics

What We Do

Our approach to Specialist Cleaning and Periodics is clear and very transparent. We are fortunate enough to have our own Brayborne Specialist Services Division, who are directly employed as a division and brand within The Exclusive Services Group. The team have the resource, the experience and the equipment to deliver a variety of specialist services which include but are not limited to; -

- Disinfection & Sanitisation given our GBAC Technician status
- Stadium and Event Cleaning
- Data Centre Centre
- IT Cleaning
- Bakery and Kitchen Cleaning
- Specialist Floor care
- Carpet Cleaning
- Deep Cleans including pandemic deep cleaning

Shown above and below are some examples of the work undertaken and the considerable experience and knowledge of our team.

Data Centre

Following the completion of their new data centre, a world leader in data management contacted Brayborne to manage the post build clean up – removing all dust and debris to ensure their safety systems ran efficiently and effectively.

Data Centre (cont.)

Within a high security facility, our client manages the secure, massive data needs of major airlines and international organisations, and were both confident and satisfied with Brayborne Specialist Services delivery of a professional cleaning service within a highly sensitive computing environment.

As well as undertaking specialist cleaning at their London sites, we now supply a daily cleaning service to the client sites in Reading and Slough.

Diversity is the watchword of the Brayborne team and for this valued client in particular, we also clean all of their industrial rooftop air conditioning units, maintaining the essential temperature of all their systems.

Oven Fit for a King, or Prince

A Middle Eastern Prince asked Brayborne Specialist Services for help. He had heard how good we were with oven cleaning and of our 25 years' experience. The result was that he asked us to attend.

Our 'specialist team' dedicated to a range of specific cleaning disciplines were put into action and in next to no time we had another happy customer with a sparkling, hygienic kitchen, with the result that we were asked to do more than just the ovens. This is by far the largest kitchen we regularly deep clean and are now contracted to do so whenever overseas visitors have been in residence alongside a BBQ area that is larger than your average domestic kitchen.

We're very proud of our royal connections but we apply the same attention to detail for all of our clients, which include large teaching kitchens, restaurants and preparation rooms for further education colleges.

We also provide a partial or a full deep clean for many catering organisations on a one off or a regular basis. Whatever you need, you are in good hands.
